information on a number of environmental threats ranging from oil spills, to hurricanes and tsunamis, to space weather.

**NOAAWatch** is a website offering information about ongoing environmental events. NOAAWatch explains the role of NOAA in prediction, monitoring, and recovery from environmental hazards. It provides public access to current information on a number of environmental threats ranging from oil spills, to hurricanes and tsunamis, to space weather.

The National Hurricane Center issues Public Advisories on their website for active tropical cyclones every six hours at 5 a.m., 11 a.m., 5 p.m., and 11 p.m. EDT. When coastal watches or warnings are in effect, Intermediate Public Advisories are issued at either two or three hour intervals between the regular Public Advisories. Special Public Advisories may be issued at any time to advise of an unexpected significant change in the cyclone or when watches or warnings are to be issued.
